

MUHAIMIN ABDILAH

Software Engineer (Fullstack)

Central Java, Indonesia | muhaiminabdillah85@gmail.com | [+62 857 4303 0517](tel:+6285743030517) | linkedin.com/in/muhaimin-a8 | github.com/muhaimin-a8

PROFESSIONAL SUMMARY

Software Engineer with strong backend focus and hands-on experience building and operating production-ready systems using TypeScript, Node.js, Golang, and .NET. Proven ability to deliver scalable web and mobile applications, design RESTful APIs, and deploy containerized services using Docker and Kubernetes. Experienced in Agile environments, CI/CD automation, and rapidly adapting across technology stacks to deliver reliable, business-critical solutions.

WORK EXPERIENCE

Software Engineer (Freelance)

Self-Employed - Remote

August 2025 – Present

- Revamped Flutter mobile application UI based on new design guidelines, improving usability and visual consistency.
- Implemented new features and resolved bugs to improve application stability and support ongoing product needs.
- Collaborated with stakeholders to translate feature requirements into technical solutions.

Software Engineer - Fullstack

Refactory - Yogyakarta, Indonesia

August 2024 – August 2025

- Developed and maintained multiple production-grade web and mobile applications across finance and corporate domains, supporting both internal teams and external clients.
- Designed and implemented backend services and RESTful APIs to support business workflows and data integration across systems.
- Worked with PostgreSQL to design schemas, write queries, and ensure reliable data storage for application features.
- Built and maintained CI/CD pipelines using Jenkins and Docker to improve release reliability and reduce manual deployment effort.
- Collaborated closely with QA engineers, project managers, designers, and senior engineers in Agile Scrum teams to deliver features from requirements to production.
- Quickly onboarded to new projects, domains, and technology stacks, enabling consistent delivery with minimal ramp-up time.

CERTIFICATIONS & COURSES

Backend Developer Expert

Dicoding Indonesia x IDCAMP 2022

[see certificates](#)

- Clean Architecture, Automated Testing, CI/CD, Application Security.

DevOps Engineer Expert

Dicoding Indonesia x AWS Academy 2022

[see certificates](#)

- Microservices, Docker, Kubernetes, and Container Orchestration.

EDUCATION

Science (MIPA)

SMA Muhammadiyah Pituruh - Central Java, Indonesia

Graduated: 2023

SKILLS

- Languages: TypeScript, Golang, C#, Python, Dart
- Backend: NodeJS, .NET
- Frontend: React, Vue, NextJS, Flutter
- Databases: PostgreSQL, MySQL
- DevOps & Cloud: Docker, Kubernetes, Jenkins
- Tools & OS: Git, Linux

LANGUAGES

- Bahasa Indonesia (Native)
- English (Professional Working Proficiency - Reading & Listening)
